

SURTERRA mid early

FLEXIBLE, SECURE AND HIGH YIELDS

Advantages:

- Double use hybrid with high starch content and an over average digestability
- Single cross hybrid with fusarium-health
- Stable plant with relativ high stature

Cultivation:

SURTERRA characterizes itself by a very good environmental stability. Due to this aspect secure yields in silage, biogas or grain can be achieved.

Short profile:

---- = very low resistance/early/short,

++++ = very high resistance/late/long
