

# SUNSET DS1469C mid late

## Advantages:

- Huge and very tall plant
- High yields in silage with medium qualities
- Ideally fits for biogas production

## Short profile:

	---- = very low resistance/early/short,					+ + + + = very high resistance/late/long				
Plant height										
Dry matter yield										
Starch yield										
Lodging Res.										

# SUNSET DS1469C mid late

## Hybrid structure:

Hybrid type                      threeway cross

Grain type                        flint dent

Silk flowering date

## Growth:

Plant height

## Resistance:

Lodging Res.

## Yield & quality silage:

Dry matter yield

Starch yield
