

MATTHUS _A

Alternative wheat

Advantages:

- Alternative wheat with short straw and high winterhardiness
- Clearly improved yields compared to concurrently tested winterwheat
- Best commercial quality (protein, falling number, zeleny) high to very high

Cultivation:

Premium wheat production after late harvest crops. Wide sowing time from middle of October to April.

Short profile:

---- = very low resistance/early/short,

++++ = very high resistance/late/long

Plant Development

Vitality

Winter hardiness medium

Drought resistance high
