MARTHE 2-row

Reliable malting quality, fits maltsters demand

Advantages:

- Since 9 years proved quality for malting and brewing in several countries
- Medium early density -type with high to very high mildew resistance
- Very good extract values, high final attenuation, very balanced soluability

Cultivation:

Universal fit. Careful N-fertilization to reach more specification for raw protein.

Short profile:

Plant Development

Maturity

Vitality
Lodging resistance

Plant Health

Mildew

Brown rust

Quality

Hectolitre weight

Grading (> 2,5 mm)
