

POSEIDON Yellow hulled

Extraordinary high yield, good lodging and brackling resistance

Plant development and vitality:

Panicle emergence	
Maturity	
Straw maturity	medium

Yield structure:

Panicles/m ²	
Grains/panicle	
TGW	

Sowing:

Time of sowing	end of February until middle of April
Seed rate	locally adapted

Straw:

Plant height	medium
Lodging resistance	
Stem brackling resistance	

Disease resistance:

Mildew	
Crown rust	
Leaf spots	
Septoria	

Plant protection:

Fungicides	profitable under very high disease
Insecticides	follow official recommendation

Quality:

Grading (> 2,0 mm)	
Hectolitre weight	
Kernel content
