

SCOTTY White hulled

Beams your spring oat cropping up!

Advantages:

- Excellent yield stability with top rankings in official trials in Europe
- Good standing power and high resistance to straw break at medium to long plant height
- High resistance to Powdery mildew (pm7 resistance)
- Very high kernel content & sufficient hectolitre weight
- medium-large grain size & good hullability

Short profile:

---- = very low resistance/early/short,

++++ = very high resistance/late/long

SCOTTY White hulled

Beams your spring oat cropping up!

Plant development and vitality:

Panicle emergence	
Ripening	

Yield structure:

Panicles/m ²	
Grains/panicle	
TGW	

Straw:

Lodging resistance	
Stem brackling resistance	

Disease resistance:

Mildew
