

NORDKAP A

High yield, high N-efficiency, sowing after wheat

Advantages:

- High yielding allrounder with extraordinary protein content, loaf volume and flour yield
- Good resistance to lodging, robust disease profile (especially against mildew, yellow rust, cerco)
- Very stable falling number safes quality in humid years

Cultivation:

NORDKAP is a new generation of variety, which brings progress along the total value chain (farmer, miller, baker and consumer)

Short profile:

---- = very low resistance/early/short,

++++ = very high resistance/late/long

Plant Development

Vitality

Winter hardiness medium to medium high

Drought resistance (7) high
