DUKATO

Low cost population rye

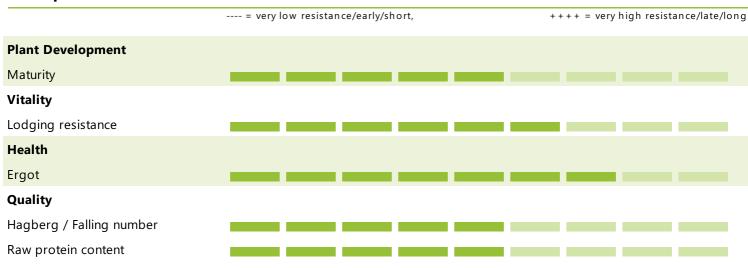

Advantages:

- Medium tall population-rye-variety with very high yield potential
- Very good resistance against mildew, brown rust and rhynchosporium
- Safe commercial quality

Cultivation:

For extensive and intensive cultivation on light and dry rye regions.

Short profile:

Version: 11.05.2020 / 1.00

Breeder: Hybro Saatzucht GmbH & Co. KG, Germany

DUKATO

Low cost population rye

Plant development and vitality:

Ear emergence

Maturity

Yield structure:

Ears/m²

Grains/ear

TGW

Sowing:

Time of sowing - poor soils

Dry and poor soils: 15th of September until end of October, better soils: 20th of

September until beginning of November

Seed rate

locally adapted

Straw:

Plant height

medium to tall

Lodging resistance

Plant growth regulator

locally adapted

Disease resistance:

Mildew

Rhynchosporium

Brown rust

Ergot

Fungicides for intensive cultivation:

Breeder: Hybro Saatzucht GmbH & Co. KG, Germany

Standard disease pressure

Standard disease pressure combination product in EC 39 - 49

High disease pressure

Treatment splitting in EC 32 and EC 49

Quality:

Hagberg / Falling number

Raw protein content

Version: 11.05.2020 / 1.00
