Winter feed barley

KATHMANDU 2-row

Advantages:

- High yielding variety on level of 6-row standards
- Balanced resistance in the range of rhynchosporium, net blotches and mildew
- Good cultivation characteristics by midearly ripening and moderate straw-stability

Cultivation:

Extraordinary yield in South-Germany, fits to typical areas of two-lines and to light soils due to best drought tolerance

Short profile:

	= very low resistance/early/short,	++++ = very high resistance/late/long
