Spring malting barley

UTA 2-row

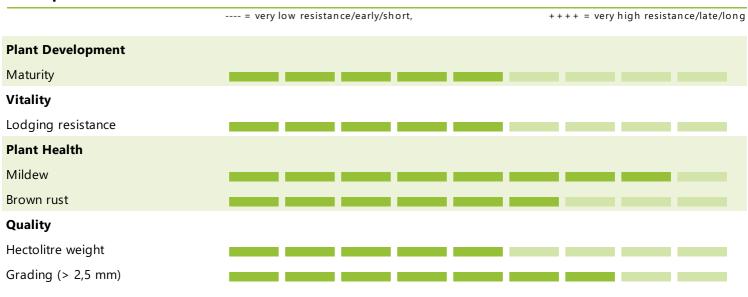

Advantages:

- High yield, 5% above best standard variety
- Early grain filling, big kernels
- High proteolytic modification, medium cytolysis

Cultivation:

High yield stability and high TGW are advantage for growing in regions with poorer soils

Short profile:

Breeder: Nordsaat Saatzucht GmbH, Germany Version: 11.05.2020 / 1.00

Spring malting barley

UTA 2-row

Plant development and vitality: Ear emergence Maturity **Yield structure:** Ears/m² Grains/ear **TGW** Sowing: Time of sowing beginning of March until middle of April Seed rate locally adapted Straw: Plant height short to medium Lodging resistance Plant growth regulators locally adapted **Disease resistance:** Mildew Net blotch Rhynchosporium Brown rust Under high disease pressure (focus brown rust) a splitted treatment in EC 32 + EC 49 is Plant protection profitable **Quality:** Grading (> 2,2 mm) Grading (> 2,5 mm) Hectolitre weight Raw protein content very low
